

Only the EXPERTS In Cutting Know The Quality of this Plate and INSIST on the registered trademark.

# Volcano Plate®

Manufactured by PT Krakatau Steel which utilises a hot thermomechanical control and desulfurization process using ladle furnace - the vital component for producing high quality hot rolled steel for special applications.

At PT Krakatau Steel strict control is exercised over such factors as strip thickness, deviation, width, and finish rolling temperature to ensure the end user of **Volcano Plate®** is fully satisfied when either cutting or processing this unique plate.

HA250 - Volcano Plate  
HA350 - Volcano Plate plus 350  
Pickled & Oiled - Volcano Plate plus P & O
